

TANZANIA NATIONAL PARKS

MAWENZI TECHNICAL CLIMBING GUIDELINES

November , 2017

1.0 Background

Mt Kilimanjaro is the highest mountain on the continent of Africa with three distinct peaks, Shira (3962m), Mawenzi (5149m), and Kibo (5895m) Mawenzi is the second highest peak on Kilimanjaro. The rugged peak of Mawenzi (5,149 m) lies to the east. The volcano known as Mawenzi formed as a result of another eruption within the Shira caldera. The top of its western face is fairly steep with many crags, pinnacles and dyke swarms. Its eastern side falls in cliffs over 1,000 m high in a complex of gullies and rock faces, rising above two deep gorges. Mawenzi peaks have seven peaks as listed from north to north:

- Nordecke 5136 m
- Hans Meyer 5149 m, highest point, - Purtscheller 5120 m
- Borchers 5115 m
- Klute 5096 m
- Latham Peak 5087 m
- Londt 4945 m.

The terrain of Mawenzi peak makes most its peaks unreachable but by technical roped ascents. Thus, these guidelines are therefore developed to set precaution to enable climbers to have important information for the climb.

2.0 AREAS OF OPERATION

There will be three routes for the climbers to Mawenzi peak these include:

- i. Rongai route down Marangu gate
- ii. Marangu route via Zebra rock down Marangu gate
- iii. Machame, Lemosho and Londorosi routes via Northern circuit down Mweka gate.

3.0 Tour Operator requirements

The operator shall have: -

- i. A valid Mountain TTLB license.
- ii. A clean business records.
- iii. Technical climbing guides
